

Brass Monopoint

Retail Price: \$798 (Natural Brass) / \$871 (Brushed Patine/Gunmetal Bronze)

Hans Verstuft, Belgian architect and industrial designer, just released his new '**Brass Monopoint**' wall or ceiling light and it is available at Plug Lighting

The cylinder fixture is mounted on a minimal backplate. The cylinder also hides the light source to achieve a dark light effect with a standard retrofit lamp. Its elegant suspension makes the luminaire more of an object. Patinated brass has a timeless aspect, it shows the material in its depth which can not be obtained with coated materials. *First picture shows an aged finish.
