

D90

Garbi

Applique that seems to take form from the wall itself, in a single solid volume of soft, regular surfaces that meet to create precise edges that become striking graphic signs. When the lamp is turned on, the light of the LED rebounds on the wall, creating a vivid contrast, and then slides inside the opening, illuminating it and delicately forming an arch on the wall.

Available in two finishes – aluminium with matte white powder coating in an embossed effect, or with external finish in metallized aluminium – Garbí is a lamp conceived to also function when it is off, because ambient light brings out the solid presence of its gently shaped form.

Designed by: David Dolcini, 2016

Material: Die-Cast and deep-drawn aluminum

Diffuser: Chrome/White Textured White

Size:

7.8" W x 6.3" D x 5.5" H

30W LED 2700K
2020 lm (delivered)

Dimmable with wall control.
