

Curl

Expressing complex design, Curl's function is balanced with interaction and play. Curl contains a special LED module that permits variation of temperature of white light, from 2400K to 3500K, thanks to a simple rotation of the diffuser. Switch located at the center of the base also has a dimmer function.

Designed by: Sebastian Bergne, 2012

Materials:

Body in die-cast aluminum

Reflector in opaque technopolymer injection molded

Colors: White, mirror structure finish

Size:

8.3" W x 9" D x 10" H

8W LED CRI>90

Beam Angle 110

Tunable White 2400K to 3000K

Dimming Switch 10-100%
