

# MESH

Suspension lamp offering multiple lighting scenarios for personalized aesthetic and functional performance. The lightweight, almost transparent structure composed of a network of metal cables with the LED positioned at their intersections conceals the complexity of the product. Intensity can be adjusted and it is possible to choose which sectors to illuminate. Four sizes available in standard black finish with a steel structure and polycarbonate lenses. All Mesh suspension versions are preassembled and ready for fast installation.

Also available as wireless with kit or ceiling mount.

Design by: Francisco Gomez Paz, 2015
