

COMMISSIONED CRYSTAL PENDANT CHANDELIER

*A commissioned piece for a site-specific project.

Inspired by the repetition of the window mullions that were predominate throughout the site, the structure of the chandelier is a three dimensional interpretation of the window patterns. During the day, the presence of the structure lends an architectural element to the room. At night, the lights float, creating a quiet constellation. Hand waxed bronze, darkened patina finish, 27 crystal sphere pendants.

When necessary, reinforce the ceiling.
