

MAIJA

Metallic lampshade and circular ceiling rosette with brass structure finished in matte. The collection originally designed in 1955, now incorporates built-in adjustable LED technology, capable of blending functionality and intimacy at the same time. Re-edited in 2 sizes, with both models having an inner white glass diffuser to help filter light. Also available as table and floor lamp.

Tapiovaara said that “it is impossible to create a new object without a point of reference, and nature is the best and closest manual for the industrial designer. Whether in terms of the object’s purpose, that is, its functional requirements; or in terms of shape, colour, material and adequate proportion”^W. In 1955, when Alvar Aalto was the dominant figure of Helsinki’s cultural life, Ilmari Tapiovaara presented himself as the first Finnish non-architect designer. An expert in chairs and furniture, he created his sole and unique household lamp: Maija.

The Maija collection conveys the feeling of light in Baltic cities, where the streets are barely illuminated, apart from the light beaming through the windows of homes and shops: from the inside, outwards. Inspired by this, Tapiovaara created a honeycomb structure composed of stacked metal discs that filters out its happy inner light.

A striking luminous object, table, floor or pendants lamps. The pendant version has been reedited in two sizes, with 15 cm or 30 cm diameter discs. Both models feature an interior white glass diffuser that filters the light; they can be used as single units or in a sequence. The Maija family is part of our Design Classics collection, a series of objects created at different times during the Modernist era.
